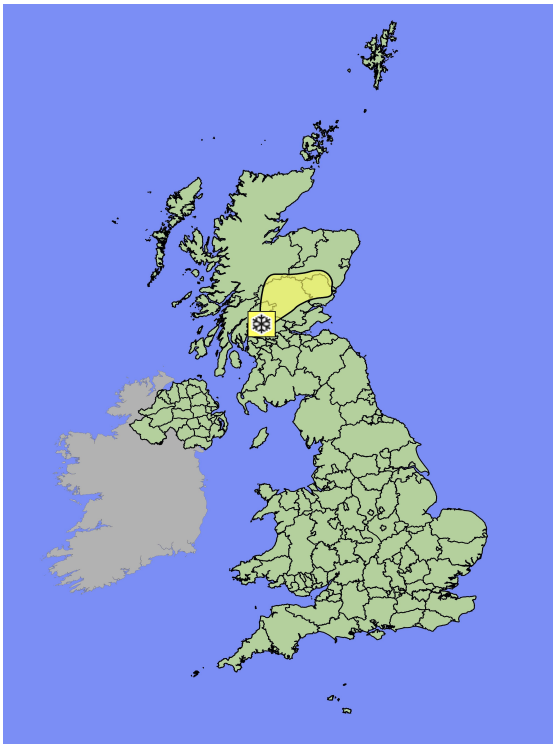
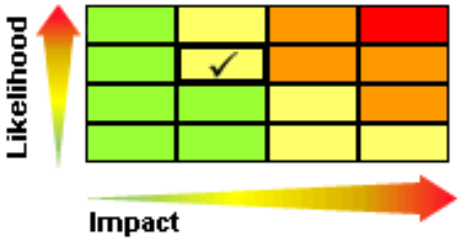
National Severe Weather Warning Service





CANCELLED

Chief Forecasters Assessment
While most of the snow is expected on higher ground, some will fall to low levels, especially in Angus.

The Met Office have issued a **Yellow Warning** of **Snow**

Valid from **06:00 on Sat, 04th Feb 2012** until **18:00 on Sat, 04th Feb 2012**

Outbreaks of sleet and snow will spread from the west on Saturday morning. Accumulations of 2 to 5cm are likely, mainly on ground above 150m, with perhaps 10cm on roads above 300m. Snow will turn increasingly to rain on lower ground, before clearing from the west by evening. After dark falling temperatures will then lead to risk of widespread ice.
